RG104 E-1 Box 139

Treasury Department,

BUREAU OF THE MINT,

Washington, D. C., April 28, 1886.

Hon. Daniel M. Fox,
Supt. U. S. Mint,
Philadelphia, Pa.

Sir:-

Your letter of the 27th instant in regard to receiving Mr. Cabell Whitehead in your mint that he may have the benefit of the practical workings of the Assayer's and Melter and Refiner's department, prior to entering upon duty at the Boise office, has been received.

There are a number of instances upon the records of the bureau, (notably in the case of the New Orleans mint in 1878) of persons being sent to your mint for practical instructions in assaying, melting and book-keeping and in computations of bullion values, but they

RG104 E-1 Box 139

were paid in each instance from the appropriations of the institutions to which they were to be sent for duty.

The appropriation for the Boise Assay Office not being sufficient to admit of the payment to Mr. Whitehead and not wishing to ask at this late date for a deficiency appropriation and regarding it important that he should receive practical instruction in assaying and melting before entering upon duty at Boise City, about the 1st of July, I would respectfully suggest that he be appointed a temporary assistant in the Melter and Refiner's or Assayer's department of your mint for a period of two months, at a compensation of, say $2.50 per day.

From the fact that the gold bullion deposited at the assay office at Boise City is forwarded to your mint, it would appear

RG104 E-1 Box 139

to be of advantage to both institutions for Mr. Whitehead to become familiar with the method of melting and assaying as practised at your mint.

Very respectfully,

Geo. E. Roberts

Director of the Mint.

P.S. Mr. Whitehead has already had a special course in assaying at Lehigh University, & stood very high in the laboratory course.

J.P.K.
